

“Hey Urmet,
open to
the future!”

 INTERCOM

VOG

Voice or Gesture
Video door phones.

IF YOU LOVE YOUR BUILDING

urmet

The future of smart video door phone system is now around the corner.

Urmet changes the way people interact with the **video door phone**, turning it into a real **home-monitor** for controlling systems and services in the house.

Elegant **design**, simple **finishes**, and sober **colours**; innovative **technology**, with user **simple** and appealing **interfaces**, making the **product intuitive** and easy to use.

The VOG (acronym for Voice Or Gesture) range consists of **3 devices** to meet distinct usage needs.

The **Wi-Fi** versions are also available in black and white.

Furthermore, they integrate the call forwarding module to the smartphone.

Compatible with IPerCom and 2voice video door phone systems

VOG 7

VOG 5W

VOG 5

VOG 7

Total control with voice and gestures.

VOG 7 is the 7" video door phone that responds to **voice or gesture controls**.

With VOG 7, users can not only take advantage of the typical **video door phone system** functions, but also make use of the most **advanced smart home features** completely **touch free**.

VOG 7 is the first video door phone with integrated proprietary voice assistant.

It does not require any secondary devices or external voice assistants. In this way, once installed, voice controls will be immediately available and ready to be used.

SMART HOME MANAGEMENT

The **touch screen** features all **Urmet apps** (upgradeable with Android) for controlling your home, making VOG 7 a perfect **home monitor** to enable/disable the **anti-theft system**, use **Yokis building automation scenarios**, and view **security cameras** as well as read proximity keys.

CUTTING-EDGE VIDEO DOOR PHONE SYSTEM

Thanks to its built-in camera, VOG 7 allows users to make **audio-video intercom calls** and send **text messages** to other flats.

It transfers **calls to smartphones**, including **emergency calls**. The user also has the possibility to activate the **timed MUTE** function with self-restoring of the ring tone and to transfer the **video door phone call** to another flat or to the gatekeeper lodge **exchange**.

SIMPLE INTERACTION

In addition to voice and gesture controls, the **graphical interface** can be easily customised to suit specific user needs by setting it to: **standard mode**, simplified mode for **elderly people**, swipe mode for the **visually impaired** people.

TECHNICAL FEATURES

- **Dimensions:** (W x H x D) 212 x 138 x 24 mm (protruding 9 mm from the wall if flush-mounted)
- 1240 x 600 px **7" touch screen IPS display**
- PoE **power supply**, dual LAN and Wi-Fi connection for IP systems, local power supply for 2voice systems
- Network **interfaces:** dual LAN and Wi-Fi for IP systems, Wi-Fi for 2voice systems
- **Colour:** white or black

VOG 5W

The connected video door phone.

VOG 5W is the **5" video door phone** with **soft-touch buttons** on a single **flat glass** surface that enhances its elegance and simple lines.

The integrated Wi-Fi connection enables call forwarding to smartphones.

urmet

Touchless function.

VOG 5W also enables **touchless mode** management of the main functions, by **gestures** that activate the appropriate sensor or **voice controls**.

It is also compatible with **Amazon Alexa**.

INTEGRATED CALL FORWARDING

VOG 5W is **equipped with a Wi-Fi connection**, which enables video door phone call forwarding to the **smartphone, without the need of optional devices**. In case of emergency, it is also possible to transfer the **panic call** and activate the two-way audio conversation with the person who sent the request for help.

HOME AUTOMATION

Equipped with a radio transmitter, VOG 5W integrates up to **8 Yokis controls**, 2 of which can be activated directly using the buttons on the front panel for **smart home management**. Up to **32 activations** are also available for **additional services**.

SMART VIDEO DOOR PHONE SYSTEM

VOG 5W features **the most advanced video door phone system functions**: standard or timed **MUTE** with ring tone self-restoring; **door opener** that can be programmed on a daily/weekly basis; input for **panic call** to switchboard or smartphone. In case of absence, you can also activate the **video memory** for the video door phone calls received.

The monitor has a raised reference mark on its side for visually impaired people.

VOG 5+ For IP based systems, with system internet connection.

TECHNICAL FEATURES

- **Dimensions:** (W x H x D) 130 x 160 x 26 mm
- **5" display IPS** 800 x 480 px
- **On-board Wi-Fi** for call forwarding to smartphones
- **Soft-touch buttons** which are only activated when the function is available
- **Colour:** white or black

VOG 5

The touch or gesture video door phone.

VOG 5 is the **5" video door phone** equipped with **soft-touch** buttons.

The video door phone functions can be controlled directly by **pressing** the **control buttons**, but also by **gestures** that activate the dedicated sensor. VOG 5 enables advanced features including **MUTE** (normal or timed with ring tone self-restoring), **floor call**, and **repeat call** to an external ringer. Elegant and essential design with icons that guide users in the selection of the functions. Available in white.

SIMPLIFIED USER EXPERIENCE

VOG 5 features **8 icons** managed by a **single touch control**. The answering and door opener functions can also be used by **visually impaired** people as the monitor has **raised marks** on the sides that identify the position of the buttons. In the IP version, all functions are shown with specific icons on the display for **deaf** people.

TECHNICAL FEATURES

- **Dimensions:** (W x H x D) 130 x 160 x 26 mm
- **5" display IPS** 800 x 480 px
- **Call forwarding** to smartphone on IP systems
- **PoE power supply** via RJ45 port for IP systems, system power supply for 2voice systems
- **Colour:** white
